Software engineer with over 3 years of experience building scalable web applications and platforms. Specializing in modern frontend as Next.js with React and backend technologies with a focus on performance optimization and excellent UI/UX. Skilled in developing comprehensive solutions from concept to deployment.

WORK EXPERIENCE

Mavin Company   **Córdoba, Argentina**
Technical Lead   *July 2024–February 2025*

- Led the development of a SaaS platform for content generation, enabling users to create high-quality images through advanced prompt engineering and multiple input methods.
- Built monolithic architecture using Next.js, React, MongoDB, TypeScript, and RESTful APIs for seamless data flow across application layers.
- Implemented cloud storage solution with DigitalOcean Spaces for large prediction files.
- Crafted responsive UI with React, TypeScript and Tailwind CSS that boosted user engagement.
- Integrated dual-payment system (Mercado Pago/Stripe) and Auth0 authentication.

Mavin Company   **Córdoba, Argentina**
FullStack Developer   *November 2023–July-2024*

- Developed Prodeman App, a platform for managing HR operations, improving task completion by 40%. Used Django, Celery, and Langchain for real-time processing and job matching. Designed landing pages, forms, and user roles for large-scale company administration.
- Created comprehensive landing pages, intuitive forms, and role-based permissions for large-scale company administration.
- Built AI Lessons App, a SaaS tool for educators, generating customized lessons and exams while supporting multiple users simultaneously.

Freelancer   **Córdoba, Argentina**
FullStack Developer   *December 2022–Present*

- Developed a custom landing page for the Mindfulness & Trekking Experience project, integrating multimedia elements and a booking system to enhance user experience.
- Designed a cohesive brand identity, including logo and style guidelines, that aligned with the tranquil and adventurous theme of the client's business.

EDUCATION

Universidad Tecnológica Nacional   **Córdoba, Argentina**
System Engineer   *2020–Present*
